About

This is a simple page that you can use to select and show a card to another person.

You can share the page to another device by clicking the `QR` code in the top left.

Wordlists

General

These wordlists have pictures (mostly from Irasutoya!) associated with them, which makes them nice to use:

- Alphabet
  - Let's Try 1 - Lesson 6 (Uppercase)
- Animals
- Christmas (winter)
- Colors
- Countries
  - Junior Sunshine 6 - Lesson 3
  - Junior Sunshine 6 - Lesson 3 + Canada
- Halloween
- Months
- Numbers (1-20)
  - Ordinals (1st-31st)
- Occupations (Junior Sunshine 6 - Lesson 10)
- Shapes
  - Let's Try 1 - Lesson 7
- Prefectures
- Sports
- Stationery
  - Let's Try 2 - Unit 5
- Valentine's Day

Junior Sunshine 5

These wordlists have pictures that match with the cards available in the back of the textbook.

- Alphabet
  - Uppercase
  - Lowercase
  - Words (i.e. **a**nt, **b**ear, **c**ow, ...)
- Phonics
- Lesson 2
  - Months
- Lesson 3
  - All
  - Subjects

Junior Sunshine 6

These wordlists have pictures that match with the cards available in the back of the textbook.

- Alphabet
  - Uppercase
  - Lowercase
  - Words (i.e. **a**nt, **b**ear, **c**ow, ...)
- Phonics
- Vowels

Custom Wordlists

Please see the [wordlist documentation](#) to see how to make your own wordlist.

After uploading your wordlist to the web, change the path to the wordlist in the URL:

```
https://altivities.earthiverse.ca/cards/?wordlist=<path-to-url-here>
```

Multiple Wordlists

Use the following URL pattern to combine multiple wordlists: `https://altivities.earthiverse.ca/cards/?wordlists=<path-to-url-1-here>,<path-to-url-2-here>,<...>`

Ignoring (Excluding) Words

You can ignore words from your wordlist(s) by adding `&ignore=<word 1>,<word 2>,<...>` to the URL.

Example: [https://altivities.earthiverse.ca/cards/?wordlist=../wordlists/General/numbers.json&ignore=one,three,five](#)

Filtering (Including) Words

NOTE: This is not for including *extra* words. To do that, you need to add an additional wordlist, or modify the wordlist to include more words.

You can specify the set of words you want to use by adding `&include=<word 1>,<word 2>,<...>` to the URL.

Example: [https://altivities.earthiverse.ca/cards/?wordlist=../wordlists/General/numbers.json&include=ten,eleven,twelve,thirteen,fourteen,fifteen,sixteen,seventeen,eighteen,nineteen,twenty](#)
